Professional career

As an employee

2017–2017 **IT specialist**, KEYBIRD IT GMBH, Stuttgart – Germany.

At Keybird I worked as a software developer with Java as the main language. As a starter, it was planned that I help out the current team which struggled to get the REST API of their project done in time. After that I should switch to another long term project which was in a very early planning phase. Unfortunately, the project setup changed and the REST API development got on hold in favour of other project-milestones. Keybird was not able to put me on another project, because most of them were still in the design-phase or already fully setup with developers and architects. Also, they had not enough resource to hold me until another opportunity to work would be found.

Areas of responsibility:

- Software development
 - Java

2015–2017 **IT specialist**, ITSOFT GMBH, Erdmannhausen – Germany.

My job at ITsoft GmbH contained several areas in the IT landscape. From providing first level support to the employees to planing and realizing complex network scenarios, writing software to control robots and even build complete devices based on custom-built hardware. For those tasks, a tight relation to the customers was a must and also being compliant with given specifications and industry standards.

Areas of responsibility:

- Project management
- Consulting
- All-Level-Support
- Rollouts
- Software development
 - QT
 - Java
 - C/C++
 - VBA, VB.NET
 - PHP, HTML, CSS, JavaScript
 - Python, Ruby
- Construction, configuration, installation and maintainance of server systems
 - Webserver
 - Database servers
 - Code repository servers

2010–2014 **IT specialist**, SIEGLE + EPPLE GMBH & CO. KG, Stuttgart – Germany.
At SIEGLE + EPPLE GmbH & Co. KG I worked in almost all areas of modern IT. This included support of staff locally and also remote at their PCs, mobile phones, and how they can use all the internal intranet services. Also, I had a strong focus on project management in hard - and software. In detail, this meant evaluation, planning, prototyping, implementation, testing and handover of projects.

Areas of responsibility:

- Project management
- Consulting
- All-Level-Support
- Rollouts
- Software development
 - Delphi
 - Java
 - C/C++
 - VBA, VB.NET
 - PHP, HTML, CSS, JavaScript
 - Python, Ruby
- Construction, configuration, installation and maintenance of server systems
 - Webserver
 - Database servers
 - Code repository servers

2010–2010 **IT specialist**, KIT.EDU, Karlsruhe – Germany.

As an employee of the Profindis GmbH I was set-in at the Karlsruhe Institute of Technology in the areas of first & second level support for Windows and Linux systems and also, as an IT specialist for consulting institutions on how they can effectively obtain their goals based on modern technologies.

Areas of responsibility:

- Configuration
 - Domain servers
 - DNS servers
 - DHCP servers
 - PC systems in place and at customer sites
 - Router / Switches
- Consulting
 - Consulting the employees of the various institutions within the KIT.
 - Collecting and coordination issues.
- Support
 - Telephone support for staff and administrators.
 - Telephone support for the team to help/coordinate their tasks.

2009–2009 **IT specialist**, T-SYSTEMS, Stuttgart-Leinfelden – Germany.

T-Systems employees at the location Leinfelden had to be migrated to a newly set network topology. To be able to work in the team, it was necessary for me to have knowledge about Windows networks, domain controllers, DNS, DHCP services and hardware router / switches. The pre-planning of the internal IT of T-Systems was not optimal. Time and money went out of the bounds and so it was my job to help optimize all processes. After several optimization-steps we achieved a 53 % benefit in time and money and the project only extended the given time frame by 1.5 days and budget by 3.700 Euro.

Areas of responsibility:

- Project management
 - Optimization of software-based processes
 - Coordination of the whole team
- Configuration
 - Domain servers
 - DNS servers
 - DHCP servers
 - PC systems in place and at customer sites
 - Router / Switches
- Consulting
 - Consulting the employees on the advantages which result from the conversion to the new systems/software.
 - Collecting and coordination issues regarding to the new infrastructure and pass them to the help desk of T-Systems.
- Support
 - Telephone support for employees who have problems to get along with the new infrastructure.
 - Telephone support for the team to help/coordinate the implementation of the new infrastructure.

2008–2009 **IT specialist**, STUTTGART AIRPORT, Leinfelden-Echterdingen – Germany.

The tasks at Stuttgart airport included an enormous number of activities, ranging from the simple installation of a terminal to the planning of complex rollouts. The solutions of various problems had to be implemented as accurately and quickly as possible.

Areas of responsibility:

- Project management
 - Planning rollouts
 - Coordination of the own team + the team of an external service provider
- Hardware support
 - Terminal systems
 - Server systems
 - Boarding pass printers
 - Baggage label printers
 - Scanner systems
 - Kiosk systems (Self-Checkin)
- Software support
 - Terminal systems of the air lines
 - Server systems of the air lines

2007–2008 **IT specialist**, CHARAX GMBH, Gerlingen – Germany.

As an employee of Charax GmbH it was my job to maintain the servers for the internet services provided for customers and expand them based on customer needs. There were tasks like optimizing existing websites such as DHL.de and Zueblin.de. Furthermore, I developed interfaces for internet third-party services based on Delphi and common internet technologies. For example, I built an interface between Facebook and Second Life.

Areas of responsibility:

- Project management
 - Optimization of websites
- Hardware support
 - Server systems
- Software support
 - DNS
 - Apache
 - Mail
- Software development
 - Delphi
 - PHP, HTML, CSS, JavaScript

As an executive

2005–2007 **Managing Director**, PGIT, Ditzingen – Germany.

As the managing director of PGIT I have coordinated several employees. I consulted customers on how they can optimize internal processes and then created software based solutions to achieve those optimizations. Clients included web radios, insurance agencies and architectural offices.

Areas of responsibility:

- Consulting
 - Office
 - Networks
- Hardware supply
- Hardware support
 - PC systems
 - Server systems
- Software support
 - Linux
 - Apache
 - Custom made software
- Software development
 - Delphi
 - PHP, HTML, CSS, JavaScript
